Michael Hartmann

Mike, He/Him

Summary

I'm a little bit of a jack-of-all-trades and my work history is certainly proof of that but it only tells part of the story. In all my trades and hobbies and practices a common thread connects things; and that is a chance to solve problems, shift my understanding, learn something new, and work with my hands. Personally my hobbies include photography, coffee, motorcycles, travel, and generally making/breaking things. Professionally I have experience that spans customer service, food service, construction, and software development.

Education

Trinity Western University

Bacheolor of Business Administration *Specialization in Finance*

Work Experience

MonetizeMore *Engineering Manager, Software Developer I*

January 2022 to June 2025

- Collaborate with Product and Tech to coordinate resources and drive and optimize customer relationships
- Partner with development teams to design and execute implementation plans
- Lead technical integration with publishers and grow the marketplace
- Train and educate cross-functional marketplace teams with a focus on technical initiatives
- Troubleshoot and resolve issues by manually testing delivery on apps, web, and native inventory
- Actively respond to high-level escalations relating to integrations, discrepancies and any other technical issues
- Influence product roadmap functionality based on market-driven requirements

Beaver Brothers Construction *Framing, Backframing Supervisor*

Summer 2016, Summer 2017, December 2019 to August 2021
